

# Welcome

We are so thrilled that you have embarked on the wonderful journey of EV Ownership. Welcome to **No-Gas, Low Maintenance**, Worry-free driving.

Welcome to Cleaner, Greener, Cost-Effective transportation. We are convinced that you will not regret making the switch and will never go back to gas.

Take a moment to familiarize yourself with the **operation and features** of your New Electric Vehicle.

Please feel free to call our Customer Support Hotline for questions related to your New EV.

# Charging

Your New EV is equipped with 3-Levels of charging. You can **charge from home** or your business from the grid, solar or backup systems. EV charging is easy, simply **Park & Plug**.

We recommend the use of a 240v/30amp - **Level 2 Charger** with your EV. This provides the **BEST** protection and should be installed prior to its arrival.

Our In-House electrician can conduct a **FREE** assessment of your home or business to find the best solution for you. An installation cost estimate will be provided.

Please call our Customer Support Hotline to schedule a **FREE** assessment of your location.

## **FREE PUBLIC EV CHARGING:**

# Get Started

Your New EV is equipped with **Push Start** button.

To operate the vehicle you must:

1. **Un-plug** the EV charger before operating the EV.
2. Have your **Key Fob** with you in the vehicle.
3. **Press Brakes** while pressing the Start button.
4. **Press Brakes** when shifting.

If all these conditions are met and your EV does not start or shift please call our Customer Support Hotline.

# Driving Tips

Your New EV is equipped with several **driving modes** that affect your comfort, battery range and performance.

**ECO Mode** maximizes the battery range of your EV while **SPORT Mode** maximizes performance and acceleration. You can freely switch between these modes while driving.

Your EV is also equipped with **Automatic Regenerative Breaking** this recharges the EV battery every time you Brake or Coast thus conserving energy while extending the range of your EV.

Please refer to your User Manual for more information on other features specific to your EV.

# Need Help?

Should you ever need it, Our 24/7 Roadside Assistance is available to give you the peace of mind.

Your EV comes equipped a Fix-a-Flat Inflator & Sealant Kit which contains two separate elements - a bottle of tire repair sealant and a tire inflator.

Simply;

1. Connect the plug to your EV 12v cigarette lighter adapter
2. Attach the air hose to the flat tire.
3. Turn on the pump to inject repair sealant and air into your tire at the same time.
4. Use the gauge to Inflate tire to the appropriate pressure according to your user manual.
